State DSRIP Updates

Attribution Results Available December 10, 2014

On December 1, BLHC PPS submitted their finalized network list attribution! The results of the DSRIP Project Plan Application Scale and Speed requirements will also determine whether all counties within a PPS service area meet meaningful presence thresholds. PPSs that do not meet the threshold will be notified by DOH.

Based on attribution results, DOH will also generate a provider report from the attribution data along with the aid of the Office of the Medicaid Inspector General, conduct an audit of attestations. Once the PPS partner list audit is complete, the state will conduct the final run of Attribution for Valuation (mid-January) based off of the partner lists submitted on December 1.

Thank you for submitting your attribution results! We ask our PPS Partners to retain all documentation shared.

Organizational Application Template Released to Leads

The online template for part of the full DSRIP Application has been released by the state to PPS Leads, as well as a guide designed to help PPS leads navigate the online application. As a reminder, the full DSRIP Application narrative will be released for our PPS partner's to review before submission through the online tool.

Scale and Speed Application and Toolkit Released December 4, 2014

The scale and speed application has been released for your DSRIP Project Plan Applications. The completed scale and speed application is to be submitted back by December 16. Click [here](#) to view.
